## PROFILE SUMMARY

Highly adaptable Full Stack Developer with a focus on building scalable, efficient, and user-centric web applications. Expertise in front-end and back-end technologies ensures seamless digital experiences with optimized performance. Proficiency in cloud-native development and modern frameworks enables the integration of innovative solutions into applications. Thrives in fast-paced environments, collaborating with teams to drive innovation and deliver impactful results aligned with business goals.

## WORK EXPERIENCE

Azure Cloud Developer

Feb 2024 - May 2024

### Magicbus India Foundation

- Skilled in building and deploying Azure AI solutions using Azure Cognitive Services, Azure Machine Learning, and AI-powered chatbots to enhance automation and data-driven decision-making.
- Experienced in managing Azure resources like Azure Functions, Azure App Services, Azure Storage, and Azure SQL to develop scalable, serverless applications using Python and JavaScript.
- Proficient in HTML, CSS, JavaScript, and React.js, integrating cloud-based APIs and optimizing Azure-hosted web applications for performance, security, and user experience.

Full Stack Developer

Feb 2023 - May 2023

### Inlustro

- Developed, coded, modified and debugged application programs of varying degree of complexity with full independence.
- Cultivated good working relationships with clients, strategic partners and internal teams and explained technical concepts clearly to internal and external audiences.
- Provided technical support to end-users, addressing their concerns promptly to maintain a positive customer experience.
- Worked with senior developers and designers to implement [Software] using HTML, CSS and JavaScript.
- Built front-end web Interface for engineers to control and monitor onboard system that visualized perceived surroundings and set routes of autonomous driving system.

## TECHNICAL SKILLS

- **Frontend Technologies:** HTML, CSS, Tailwind CSS, JavaScript, ReactJS
- **Backend Technologies:** NodeJS, ExpressJS
- **Databases:** MongoDB, MySQL
- **Programming Languages:** Python, R, JavaScript
- **API Development:** RESTful API

## ACTIVITIES

- Meditation
- Salutation to (Goddess) Twilight
- Handwriting practice
- Reading newspapers
- Books Study related work
- Workout Exercises
- Novel Books

## EDUCATION

### VELS UNIVERSITY 2022-2024

- Master of Computer Application
- Marks: 76.5%

### DHANRAJ BAID JAIN COLLEGE 2019-2022

- Bachelor of Science (Computer Science)
- Marks: 78%

## PROJECTS

### Pathology Classification

**Link:** <https://github.com/kvk1999/pathologyclassification>

**Tools Used:** HTML, CSS, JavaScript, Python

- An integrated healthcare solution combining AI-powered pathology classification with an e-commerce platform for medical supplies.
- Designed to enhance diagnostic accuracy while ensuring seamless access to essential healthcare products.
- A secure platform enables the purchase of medicines, medical equipment, and healthcare products.
- Direct integration between diagnosis and product recommendations enhances efficiency in patient care.
- This system revolutionizes the healthcare ecosystem by enabling faster diagnoses, reducing manual errors, and improving accessibility to essential medical resources.
