PROFESSIONAL SUMMARY

MERN Stack Developer with hands-on experience in building scalable full-stack web applications using MongoDB, Express.js, React.js, and Node.js. Skilled in developing RESTful APIs, responsive user interfaces, database management, and authentication. Experienced through internships in full-stack and Azure cloud development, with strong problem-solving abilities and a passion for building secure, high-performance web applications while continuously learning modern technologies.

KEY HIGHLIGHTS

- Hands-on experience developing full-stack web applications using the MERN stack.
- Proficient in React.js, Node.js, Express.js, MongoDB, JavaScript, and RESTful APIs.
- Developed secure authentication and authorization using JWT and bcrypt.
- Built responsive and user-friendly interfaces using React.js, HTML, CSS, and Tailwind CSS.
- Designed and integrated RESTful APIs for efficient frontend-backend communication.
- Experienced in database design, data management, debugging, and application optimization.
- Practical exposure to Microsoft Azure, cloud application deployment, and Azure AI Services.
- Strong problem-solving, analytical thinking, teamwork, and continuous learning abilities.

SKILLS/CORE COMPETENCIES

- Programming Languages: JavaScript (ES6+), Python, R
- Frontend Development: HTML5, CSS3, React.js, Tailwind CSS, Responsive Web Design
- Backend Development: Node.js, Express.js, RESTful API Development
- Databases: MongoDB, MySQL
- Cloud & AI: Microsoft Azure, Azure App Services, Azure Storage, Azure AI Services, OpenAI API
- Authentication & Security: JWT, bcrypt, Secure Coding Practices
- Tools: Git, GitHub, Visual Studio Code, Android Studio
- Development Practices: Agile Development, Debugging, Version Control, API Integration

PROFESSIONAL EXPERIENCE

Full Stack Developer | Intern | Inlustro | Jan 2023 – May 2023

- Developed frontend and backend features using JavaScript and Node.js to support end-to-end business workflows.
- Designed responsive user interfaces to improve cross-browser compatibility and usability.
- Assisted in implementing backend logic for accurate data processing.
- Participated in debugging and troubleshooting to improve application stability.

Azure Developer Intern | MagicBus Foundation | Feb 2024 – May 2024

- Developed responsive Azure-hosted applications to support scalable business workflows.
- Integrated Azure AI Services to automate repetitive tasks and enhance application functionality.
- Implemented Azure Storage Services for reliable data management and application availability.
- Applied Azure Cost Management to monitor resource usage and support cost-aware cloud governance.
- Collaborated across SDLC phases to support application development and deployment.

Full Stack Developer (MERN) | Trainee | GUVI – IIT Madras Pravartak | Aug 2024 – Nov 2024

- Designed and developed multiple MERN applications addressing real-world business scenarios.
- Implemented secure user authentication using JWT to support data protection and secure access.
- Built RESTful APIs and database workflows for efficient frontend-backend communication.
- Strengthened analytical, problem-solving, and collaborative development skills through project-based applications.

FEATURED PROJECTS

Social Media Platform (MERN + JWT + WebSockets)

- Developed a full-stack social media platform using MongoDB, Express.js, React.js, and Node.js, enabling users to create profiles, posts, likes, and comments.
- Implemented secure authentication and authorization using JWT and bcrypt to protect user accounts and application data.
- Designed RESTful APIs and integrated WebSockets to support real-time notifications and live user interactions.
- Built a responsive user interface using React.js and Tailwind CSS for a seamless experience across desktop and mobile devices.

Healthcare Pathology Classification System (Python + ML)

- Developed a web-based pathology classification application using HTML, CSS, JavaScript, and Python-based machine learning workflows.
- Implemented machine learning functionality to classify pathology-related medical data and support diagnostic analysis.
- Designed an intuitive and responsive interface to simplify data submission and result visualization.
- Integrated data visualization features to help users analyze classification results and gain insights from medical data.

MERN E-Commerce Platform | MERN Stack

- Developed a full-stack e-commerce platform with product browsing, shopping cart, checkout, and order management functionality.
- Built product catalog and order APIs to support efficient product and inventory management.
- Designed a responsive and modular user interface to provide a consistent shopping experience across devices.

Rectangle Area Calculator | MERN Stack

- Developed a lightweight full-stack application using React.js, Node.js, Express.js, and MongoDB to calculate rectangle areas.
 - Implemented input validation and error handling to ensure accurate user input and reliable calculations.
 - Applied modular application architecture to support maintainability and future feature enhancements.
-

CERTIFICATIONS

- Full Stack Development (MERN) with AI Tools
 - Microsoft Certified: Azure Fundamentals (AZ-900)
 - Microsoft Certified: Essentials of Generative AI
 - Generative AI & AI Engineer Mastermind
 - Amazon Certified: Foundations of Prompt Engineering
 - Machine Learning A-Z (Python & R)
 - Python Programming – GeeksforGeeks
-

EDUCATION

MASTER OF COMPUTER APPLICATIONS (MCA)

VELS UNIVERSITY | 2022 – 2024 | 78%

RELEVANT COURSEWORK: SOFTWARE ENGINEERING, DBMS, OPERATING SYSTEMS, ARTIFICIAL INTELLIGENCE,
CLOUD COMPUTING

BACHELOR OF SCIENCE IN COMPUTER SCIENCE (B.SC. CS)

DHANRAJ BAID JAIN COLLEGE | 2019 – 2022 | 82%

RELEVANT COURSEWORK: PROGRAMMING FUNDAMENTALS, DATA STRUCTURES, COMPUTER NETWORKS, WEB
TECHNOLOGIES, DATABASE SYSTEMS
