---

## PROFESSIONAL SUMMARY

Motivated Full Stack Software Engineer with hands-on experience in MERN stack development, Microsoft Azure cloud solutions, and AI-enabled applications. Skilled at building secure, responsive, and scalable web solutions that solve real-world problems. Through internships and academic projects, demonstrated ability to deliver business-oriented outcomes such as streamlined workflows, improved user engagement, and enhanced data reliability.

Aspiring to grow into a cloud application engineer and AI developer, leveraging strong foundations in secure coding, API design, and Agile practices to contribute to enterprise-grade solutions. Passionate about continuous learning, innovation, and applying emerging technologies to create impactful digital experiences that drive measurable business value.

## KEY HIGHLIGHTS

- Hands-on experience delivering cloud-native web applications using MERN stack and Microsoft Azure.
- Practical exposure to AI integration (Azure AI Services, OpenAI API, ML workflows) in production-style projects.
- Designed secure authentication and RESTful APIs improving application reliability and user trust.
- Built responsive UIs that enhanced cross-device usability and mobile adoption.
- Internship experience applying cost-aware cloud governance and scalable storage solutions.
- Strong foundation in Agile SDLC, debugging, version control, and secure coding practices.
- Certified in Azure Fundamentals (AZ-900) & Machine Learning A-Z, demonstrating commitment to continuous learning.

## SKILLS / CORE COMPETENCIES

- Programming: JavaScript (ES6+), Python, HTML5, CSS3
- Frontend Development: React.js, Tailwind CSS, Responsive Web Design
- Backend Development: Node.js, Express.js, REST API Development
- Databases: MongoDB, MySQL
- Cloud Platforms: Microsoft Azure, Azure App Services, Azure Storage, Azure AI Services, Azure Cost Management
- AI & ML: OpenAI API, Generative AI, Machine Learning, AI-enabled Applications
- Security: JWT Authentication, bcrypt, Secure Coding Practices, Identity & Access Management
- Tools: Git, GitHub, Visual Studio Code, Android Studio
- Practices: Agile Development, Debugging, Version Control, API Integration, Secure SDLC

## PROFESSIONAL EXPERIENCE

---

### Full Stack Developer (MERN) | Trainee | GUVI – IIT Madras Pravartak | August 2024 – November 2024

- Designed and developed multiple MERN applications, solving real-world business scenarios.
- Implemented secure authentication with JWT, ensuring data protection and user trust.
- Built RESTful APIs and database workflows, enabling efficient communication between services.
- Strengthened analytical and collaborative coding skills through production-style projects.

### Azure Developer Intern | Magic Bus Foundation | February 2024 – May 2024

- Developed responsive Azure-hosted applications, solving the problem of scaling business workflows to the cloud.
- Integrated Azure AI Services to automate repetitive tasks, improving application usability for end users.
- Implemented Azure Storage Services to ensure reliable data management, reducing downtime risks.
- Applied Azure Cost Management to monitor resource usage, enabling cost-aware governance.
- Collaborated across SDLC phases, ensuring faster deployment cycles and improved stakeholder alignment.

### Full Stack Developer | Intern | Inlustr0 | January 2023 – May 2023

- Built frontend and backend features using Node.js and JavaScript, supporting end-to-end business workflows.
- Designed responsive UIs that improved cross-browser compatibility, reducing user complaints.
- Assisted in backend logic implementation, enabling accurate data processing for business applications.
- Participated in debugging and testing, improving application stability and reducing defect rates.

## FEATURED PROJECTS

---

### Social Media Platform (MERN + JWT + WebSockets)

- Built a secure networking platform with JWT authentication, reducing unauthorized access risks.
- Designed APIs and real-time notifications that solved delayed user interaction issues, boosting engagement.
- Delivered responsive UI that supported higher mobile adoption.

### Healthcare Pathology Classification System (Python + ML)

- Developed ML-enabled workflows to reduce manual pathology classification effort, streamlining diagnostics.
- Designed intuitive UI for healthcare staff, improving data submission efficiency.
- Integrated predictive analytics that supported more consistent diagnostic outcomes.

### MERN E-Commerce Platform

- Built a secure e-commerce solution tackling cart abandonment through streamlined checkout workflows.
- Designed product catalog and order APIs that improved inventory visibility, reducing stock-outs.
- Delivered responsive UI and modular architecture, enhancing customer experience.

### Rectangle Area Calculator (MERN)

- Created a lightweight full-stack app demonstrating rapid prototyping capability.
- Implemented validation and error handling to solve inaccurate user input problems.
- Applied modular design principles, enabling future feature expansion with less effort.

## PROFESSIONAL CERTIFICATIONS

---

Microsoft Certified: Azure Fundamentals (AZ-900)

Generative AI & AI Engineer Mastermind Machine

Learning A–Z (Python & R)

Python Programming – GeeksforGeeks

## EDUCATION

---

Master of Computer Applications (MCA) | VELS University | 2022 – 2024 | 78% Relevant Coursework: Software Engineering, DBMS, Web Technologies, AI, Cloud Computing

Bachelor of Science (Computer Science) Dhanraj Baid Jain College | 2019 – 2022 | 82% Relevant Coursework: Programming Fundamentals, Data Structures, Networks, OS, Database Systems
